## Teenage Mutant Ninja Turtles

Use any color for the turtle that you would like. (Including the baby blue for the girl turtle for true fans, even if that series was the worse one made).

No AMS Needed Just color swap at layer.

Check out my large selection of earrings.

## STLs

In Bambu Studio load all STL's at one time. It will ask "Load these files as a single object with multiple parts?". Click yes. Than right click on each object and click the color for that object.

Or pause at the desired layer height to change colors.

## Bambu Studio Files

Included is the studio print profile file.

These files are designed to be used with an AMS.
