Summary

Backupsights for the Steambow Stinger for use in addition to a red-dot. Fits (and needs) picatinny-rails.

Tags: [picatinny](#) [sights](#) [crossbow](#) [stinger](#) [steambow](#)

When using a red-dot on the Steambow AR-6 Stinger 2 you loose the ironsights. If you have the right-front picatinny rail and the magazine-cover with the picatinny rail you can now use these backup sights if the red-dot battery dies.

Front and rear sight come with separate rings so you can print those in a differet colour if you want, the sights work fine without those parts. (I recommend glueing the rings in place) This is of course only necessary if you cant print in multiple colours at once.

I used DasFilament “neon-orange” and DasFilament “glow-grün v2” in combination.

Fits in combination with the arrow-quiver if the quiver is mounted far enough back on the siderail.

If you are lefthanded i think mirroring the parts will make them fit on the left side aswell.

Note that these sights are fixed in line with the magazine and can not be adjusted up/down/left/right. They should however be pointing straight ahead.
