There is no specific lightbar that fits the Ender 3 S1 PLUS. Those are Two little spacers to fit the original Creality Light for Bigger printers on the Ender 3 S1 PLUS. Just Print one of each and you are good to go to screw the light on your printer. The light need to be conected dirctly to the 24V Power Supply (or you can convert the 2 cables into the right JST connector to plug them into the light connector on the printer)

Here is an link to the lightbar:
