Summary

Updated model and texture for orca slicer to mach with current snapmaker J1s

[3D Printers](#) > [Other Printer Parts & Upgrades](#)

Tags: [snapmakerj1](#) [orcaslicer](#)

Bed model STL is almost the same as packed with orca slicer except that

- glass clips added

Texture has more changes:

- Triangle marks added
- Size 325x202 instead 324x200
- Extruders inaccessibility zones updated
- Mirror dash line added
- Center mark added

Why size 325x202 instead 324x200?

Short answer - because it is currently measured motion abilities of my printer. ver 2.7.1

Coordinates:

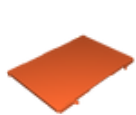

Parked to silicon: L X-13, R X338

Maximal: L X314, R X11

Min distance between nozzles: 24

Symmetrical: When L X0, R X325 (so printable bed size is 325)
