Summary

Desk Organizer with repositionable Dividers. Optional Keys included for joining multiple bases.

[Hobby & Makers](#) > [Organizers](#)

My desk has no drawers (So... I guess I should call it a table...) and needed a way to better organize the things I like to keep within easy reach. So, I designed this Modular Desk Organizer.

They'd even work pretty well as book ends...

Features:

- Bases are provided in two sizes (64x100mm and 124x100mm) for separate or combined use.
- Alternating offset slot design for Divider stability and rigidity.
- Divider slots are on 15mm centers allowing for flexibility of Divider placement.
- Print as many or few bases and dividers as you want.
- (Optional) Keys included for multiple base combination configurations. (I toyed with other ideas for combining multiple bases, but this seemed to me the best solution. Maybe someone can come up with something more elegant. In the meantime, this works well.)
- One **Key-Center** and at least Two **Key-Offset** are required for joining bases.

Printed with:

-PLA+

-15% Infill

-Default orientation for all parts recommended (removal of the Keys and Divider from the base slots may be more difficult otherwise). **Bases** print without supports or brim. **Divider** prints with supports. **Keys** print with brim.
