## Summary

External spool holder

[3D Printers](#) > [Accessories](#)

Tags: [spool](#) [holder](#)

External spool holder. Can fit spools with internal diameter more than 50mm. Require 8x22x7mm bearings, but it works without.

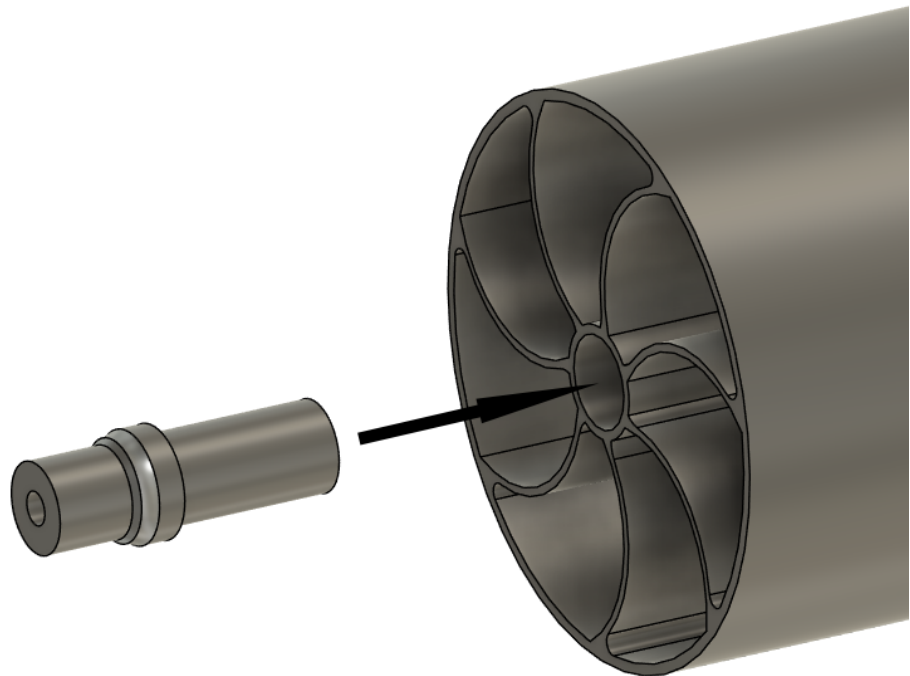

Spool specs requirements:

Internal diameter > 50mm

External diameter < 300mm

Width < 107mm

Axis require simple assembly, just press it in spool's axis bridge hole at the bottom side (rel printing position)

Printing settings:

0.2mm layers

4 walls

4 layers top\bottom

Infill 30% cubic

Brim - preferably for axis parts. I printed with 5mm outer
