Summary

Vertical LED Lightbar Hanger. Allows hanging of popular Lightbars vertically, while pointing them where you want.

[Household](#) > [Outdoor & Garden](#)

Tags: [hydroponics](#) [ledholder](#) [ledlight](#) [ledlightbar](#)

Hanger and suspension ring to vertically hang popular LED Light bars. Easily rotated to aim lights, especially for Vertical Tower Gardens. Added some holes to allow hanging of a few herbs like Sage to dry. (better to dry them in a dark cool place though)

I printed mine in Ultraviolet Glow in the Dark filament, for a fun little night accent. The camera makes them seem brighter than they are. I varied the amount of Infill, which resulted in different levels of glow.

I used 4x10mm screws to attach the Hanger to the clips included with the bar. The ring allows you to rotate the light so you can aim the light at the plants, regardless of how the ring is hanging.

I created this to go with my Modular Hydroponic Tower Garden I printed years ago.
