### Summary

Cardo Edge mount parts

[Gadgets](#) > [Other Gadgets](#)

Tags: [mount](#) [adapter](#) [edge](#) [cardo](#)

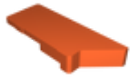

This is an export of the Cardo Edge mount parts that I modeled and used in the [Schuberth SC2 Sena mount to Cardo Edge converter](#). I figured they might come in handy for anyone trying to make their own mount adapters.

You can either download the short and the long side as individual parts and then use them aligned from the bottom with 10.2mm distance in between, also see the photo, or you can download the single solid model.
