UPDATE 12.09.2025:

I modified the tail so its no longer fragile and should stay connected with dragon. Caution is still needed, when removing dragon from the build plate. To be safe, wait for the bed to cool down and carefully remove link by link from the plate.

This is my version of Articulated crystal dragon.

Print the outer walls slow, keep cooling on, clean your bed and your dragon will be fine.

When removing from build plate, be careful not to brake any chain links. You can wait for build plate to cool down.

Do not scale down, it will be fragile.
