Introducing our newest creation: the Articulated Forest Dragon!

Embark on an enchanting adventure with our intricately designed 3D printed toy, perfect for young explorers and dragon enthusiasts alike. Now available in a convenient keychain version, you can take your dragon companion with you wherever you go!

This file comes with two options: one with a keychain hole and one without, catering to your preferences. For optimal results, we recommend printing at a 0.2 mm layer height. However, fear not if you opt for a 0.4 mm layer height; the charm of our dragon remains intact, as shown by the accompanying images.

Unleash your imagination with multi-color printing possibilities and personalize your dragon by adding a pop of color to its eyes, nose or

horns. But the excitement doesn't end there - our dragon's articulated design brings an extra element of fun, making it a delightful companion that springs to life with every shake.

Download now and embark on a DIY keychain project that promises hours of joy and creativity!

PS: Our dragon lives in the forest, he loves long hikes in the woods! So lets go on an adventure!

This Dragon is part of our Articulated Dragon Collection: <https://www.printables.com/@biocraftlab/collections/1579384>
