### Lighter and Cigarette or Joint Case

Introducing BlazeGuard: the ultimate solution for discreetly storing your essentials with an added touch of satisfaction, now your ideal companion gadget for every picnic, barbecue, or tracking and camping activities. Inspired by the popular **JointLocker**, the BlazeGuard emerged from a desire to bring a similar functionality to enthusiasts within Europe who faced difficulty in accessing the original design (<https://anotherroom.io/collections/jointlockers>). Fueled by a passion for innovation and a commitment to accessibility, BlazeGuard is offered freely to the community, embodying the spirit of DIY creativity and resourcefulness.

This sleek and compact case is designed to securely hold both a Bic lighter and your preferred smoke, whether it's a joint or a cigarette. Crafted with convenience and discretion in mind, the BlazeGuard ensures that your smoking accessories are neatly organized and easily accessible whenever you need them. Whether it's to fire up a barbecue, light up a candle on an evening candlelight picnic, ignite a campfire during a night under the stars, or even to illuminate your path during a late-night hike, the BlazeGuard ensures you're prepared for every moment, adding convenience and flair to your outdoor adventures.

Its durable construction provides reliable protection for your items, while its stylish design makes it a must-have accessory for any smoking enthusiast.

But that's not all – the BlazeGuard boasts a unique feature that adds to the experience. As you retrieve your Bic lighter from the case, it produces a satisfying pop sound, enhancing the ritual of lighting up. Say goodbye to fumbling around for your supplies and hello to effortless enjoyment with the BlazeGuard by your side.

### **Print Instructions**

- Print at a layer height of 0.2mm
- Consider using a brim if you encounter any bed adhesion issues during printing
