UPDATE: I added a new profile with a top piece with a label on it where you can put your price or name on it. You can edit it in Bambu studio. Just put some text to it.

I made this rotating keychain display. It's very sturdy and requiers no glue or anything else. If you want a taller one just simply make the middle rod taller. It rotates very smooth and doesn't fall over.

I added a second profile with a mid wheel option to make it as tall as you want.

You can sell our designs we made and are available on our makerworld page. Wit a small sub on our Patreon you get a commercial license to sell and back our non profit founding for Children with special needs: <https://www.patreon.com/wickieprints/posts>
