Summary

Five sizes of a C-clamp designed so the threaded screw portion prints laying flat, creating a strong functional clamp.

This fully printable C-clamp has been designed so that the **screw portion prints flat** on the print bed, which allows the layer lines to be optimally oriented to create an impressively strong functional clamp.

Five different sizes are provided with clamp opening sizes ranging from 3 cm to 10 cm (and the “mini” version has a bit of a cute factor). The threaded hole is designed with a keyed knockout, and so **no supports are needed** to print any of the parts.
