PS5 Stealth Controller Stand that displays your controller as if they are floating on your desk. The stand is sturdy and tries to stay hidden behind the controller itself.

Printed with tree supports, brim, and 20% infill on an Ender 3 in PLA. People in Makes had success printing the model without any support.

A variant of this model is also available for Xbox Controllers: <https://www.printables.com/model/813957-xbox-stealth-controller-stand>
