Comments

2024-06-08 Update: I've added a 2nd version that uses Small Threat T-Bolts to attach to the Tile. This May be an alternative if you prefer bolts to be independent from the part, and ensures the part stays parallel to the tiles.

I really liked how spikeon attached his drill holder to the Multiboard but the tolerances on the thread were off and the part kept snapping out of the thread. I rebuilt the entire file in Fusion360 and added a proper thread that won't fall off.

This remix is based on

Multiboard Angled Drill Holder - Large Bolt - 3D model by Spikeon Studio on Thangs

by Spikeon%20Studio

Model files

angled-drill-holder-corrected-screw-and-thread.3mf

Fully configured .3mf for OrcaSlicer/Bambu Studio
