All my models are free but if you what I do you can support me on patreon: https://www.patreon.com/teirale

You'll find four files, of which "All in one", "Body flat" and "Base'' are suitable for printing without supports, The "Body" file probably needs supports, but it is not necessary to print it, it's just one more alternative.

The "All in one" file contains both the miniature and the base in one piece.

If you already have your own bases and only want the miniature, the "Body flat" file can be printed without supports and then you can carefully trim the raft.

You can find me everywhere as Teirale, I have more minis ;)
