I designed this Bag Coat Hanger to carry on with my wardrobe organisation as we have too many bags in the house that are always in the way.

This is a simple self-supporting print that requires no supports if you orientate the part as shown in my printer bed pictures.

The black part has been printed with the Prusament PLA Galaxy Black that I earnt with my Prusameters and looks really great.

The white Bag Coat Hanger in the pictures was my first attempt, but I felt it used too much material and could be improved. The attached stl. file is for the orange and black version.

If you like this part check out my Coat Hanger Hook that is a great wardrobe space saver.
