Summary

A dice tower with a funnel-style dice drop and intriguing spiral stair case that can be printed without supports.

[nosupportsneeded](#)

This dice tower with a castle motif includes a beautiful wrap-around spiral stair case, allowing the dice to bump and roll with randomness as they descend. The tower's top provides a funnel shape that allows for the dice to be easily dropped in.

This is an easy print, and has been carefully designed so that **no supports are required**. The tower is just under 18 cm tall, allowing it to be printed on smaller volume printers as well.
