Hi,

this is the tick removal coin.

Unfortunately, there are a lot of ticks in the area where I live, which is why I designed this tool.

With these coins, you always have a tool at hand to help remove ticks.

You simply push the coin over the tick. Then you can remove it without crushing the head/body of the tick.

There are 2 variants:

A coin the size of a 1 Euro coin: approx. 23 x 2.3 mm

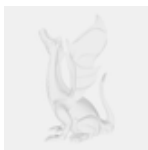

A coin the size of a 2 Euro coin: approx. 26 x 2.3 mm

Both versions have a hole with a diameter of 4 mm. This allows you to carry them either on your keychain, in your wallet or on the collar of your pet. They can also be used for the deposit locks of shopping trolleys. I recommend printing it at a 0.15 layer height if possible.

PS

This is the first time I actually tried to draw a picture in CAD, hope you like the tick on the back!
