updated 2. 5. 2024 | published 2. 5. 2024

### Summary

A place to store your airlocks during a drying cycle

[3D Printers](#) > [Accessories](#)

Tags: [polymaker](#) [stacker](#) [airlock](#) [airlocks](#) [polydryer](#)

The Airlock Dock & Stacker slide onto the lid of the PolyDryer™ Box and are held with a friction fit. The airlocks can be press fit into the dock and are also held in place with a friction fit. The Stacker version allows you to stack multiple PolyDryer™ Boxes on top of each other and the tabs on the 3D printed part make sure the boxes are aligned nicely.
