Compatible with bumper:

<https://www.printables.com/model/856904-dji-avata-2-bumpers>

Great for flying through the woods and using Turtle Mode on the grass.

The shields look too short, but it's not a bug. It's a feature - guards stay in place better, but you can easily take them off.

Please note that the bumper protection level is reduced when propeller shields are in place.

Print with **PETG**.

- 8.7 g each
