Introducing our newest creation: The Adorable Bamboo Panda!

Embark on a journey of cuteness with our charming, chubby panda keychain, designed to capture hearts and bring smiles wherever it goes. Crafted with love and attention to detail, our articulated panda is the perfect companion for panda lovers of all ages.

This file includes two options: one with a built-in keychain hole and one without, giving you the freedom to choose how you'd like to carry your cuddly companion. Whether dangling from your keys or adorning your bag, our panda is sure to steal the spotlight wherever it roams.

For optimal printing results, we recommend a layer height of 0.2 mm, ensuring every adorable detail is captured flawlessly. However, don't fret if you prefer a 0.4 mm layer height; our panda's irresistible charm shines through, as evidenced by the accompanying images.

Add a personal touch to your panda pal by customizing its features with different filament colors. Whether it's a bright bamboo-green nose or playful pink ears, the possibilities are endless for making your panda uniquely yours.

But the fun doesn't stop there - thanks to its articulated design, our panda is ready to play and pose to your heart's content. With each movement, it brings a touch of whimsy and joy to your day, making it the perfect companion for any adventure, big or small.

Download now and embark on a DIY keychain project that promises to bring endless smiles and warmth to your heart!

PS: Our panda friend adores bamboo and dreams of chilling in the lush greenery of the forest. So, let's join hands and embark on an adventure together!
