### Summary

Name LED sign/marquee

[Art & Design](#) > [Other Art & Designs](#)

Tags: [sign](#) [led](#) [ledlamp](#) [marquee](#) [namesign](#) [marqueesign](#)

This design consists of two files one for the frame and cover both are only required if you want to make it into an LED marquee/sign. It also allows for easier printing of two different colors.

No holes were made in the frame, this is to allow for the end user to place a hole either on the right or left of the name. This allows for you to customize according to a location where it might be showcased.

The cover will require finish sanding and/or file work this is to allow for a tight fit in the frame without the use of glue.

This requires approximately 2m of LED strip lights, Amazon has many options available.
