And now for something completely different!

Darth Maul's speeder from Episode I for 1:12 scale figures! Like my lightsaber models, this is split into separate parts for easier painting and realistic part lines. Each part is in the orientation I printed them, though this is difficult print and pretty much every part requires support.

The engine has an extra wide opening to store Maul's macrobinoculars. An alternate set of handlebars is included as an homage to the video game Star Wars: Demolition! Insert Maul's lightsaber on either side of the Demolition handlebars to re-live all of magical moments from a sub-par Twisted Metal knock off.

This was a fun passion project and I hope fellow action figure lovers will discover and enjoy it too!
