The Dagger of Mortis from mystical planet Mortis featured in the Clone Wars!

All of the STLs are in the orientation I printed them. Personally, I printed the Lower Blade, Middle Blade and Upper Blade with supports generated in Cura. The joints on the blade parts are meant more to be glued than a friction fit like many of my other models. The Handle Rod can be replaced with any 4 inch long, half inch diameter rod if you do not want to print that piece.

In order to preserve the sharpness of the Upper Blade, it is beneficial to print 2 or 3 at the same time in order to let the tip cool between layers.
