The lightsaber of the Wookiee youngling Gungi from the Clone Wars animated series! I've been looking for an excuse to use ZBrush somehow in the lightsabers and took the opportunity with this one to sculpt in the wood grain of the hilt.

All of the parts are in the orientation that I printed them. I used support generated in Cura for the Grip, Grip Shield A and Emitter. The grip is a pretty big part and may be the one piece you want to play around with its orientation.
