Asajj Ventress' Lightsaber! Another cool, curved design for Count Dooku's Sith apprentice.

Be sure to print 5 of the Upper Grip Inserts and two of the Pommel Inserts Outer and Inner pieces. All of the STLs are in the orientation I printed them, personally I printed the Lower Emitter, Upper Grip and Upper Emitter with supports generated in Cura, but as always let me know if you found a better way. The grip parts are all labeled with their respective numbers on top because they are all just similar enough to get confusing. All of the tolerances on them are pretty tight, this may cause some tolerance stack up issues with the crossbars, however the crossbars are scaled with that in mind. let me know if this causes any issues. Happy Printing!
