Here is Kanan Jarrus' Lightsaber! I have included Two versions of the Pommel: One with tunnel for a D-Ring and one without, personally I like to be able to stand the sabers up which the D-Ring prohibits in this case. Be sure to print five of the grip inserts and two of the indicators, just like with Luke's EP6 saber those are small parts that I'd suggest printing at the same time as larger parts to allow the layers to cool.
