## Summary

Organizer for keys

[Hobby & Makers](#) > [Organizers](#)

I was sick of having my keys dangle around, has always been a pain trying to sort through them when opening a door. I also did not want to spend a ton of money on a premade one, so as common sense has it buy a \$700 printer and make it yourself (don't worry, didn't buy a printer just for this project). All you will need to finish the part is (1x) M4 x 20mm button head screw and (1x) M4 nut.
