## Summary

various hotend holder for HSW system

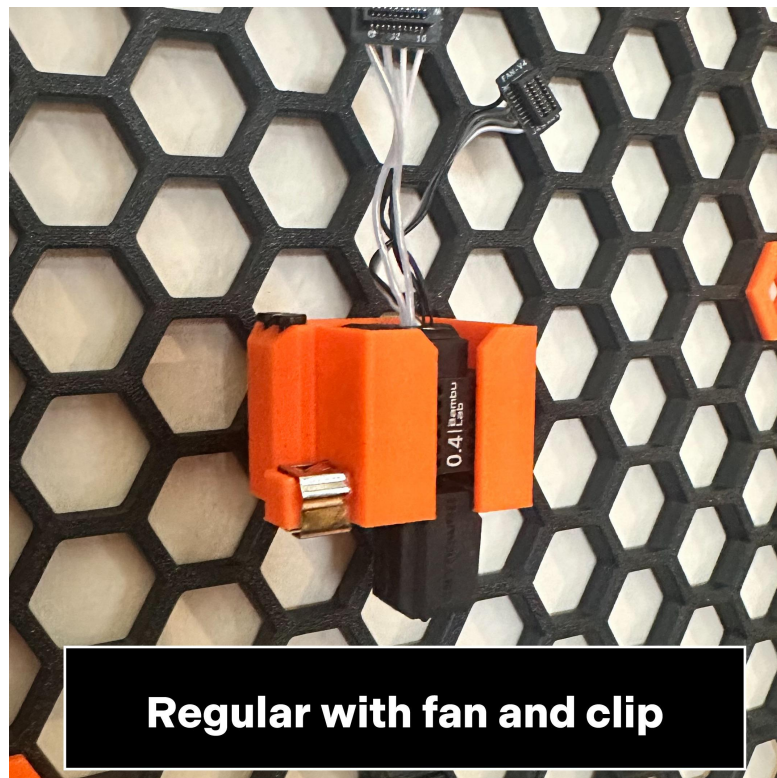

[3D Printers](#) > [Bambu Lab Parts & Upgrades](#)

Tags: [hexagon](#) [hsw](#) [bambulab](#) [x1c](#) [p1p](#) [p1s](#)

This HSW hotend holder is designed to cover as many cases as possible, whether you want to hold a complete hotend assembly with fan, without fan, with the spare clip, HSW insert type, or simply wanna go for economic and fast choice.

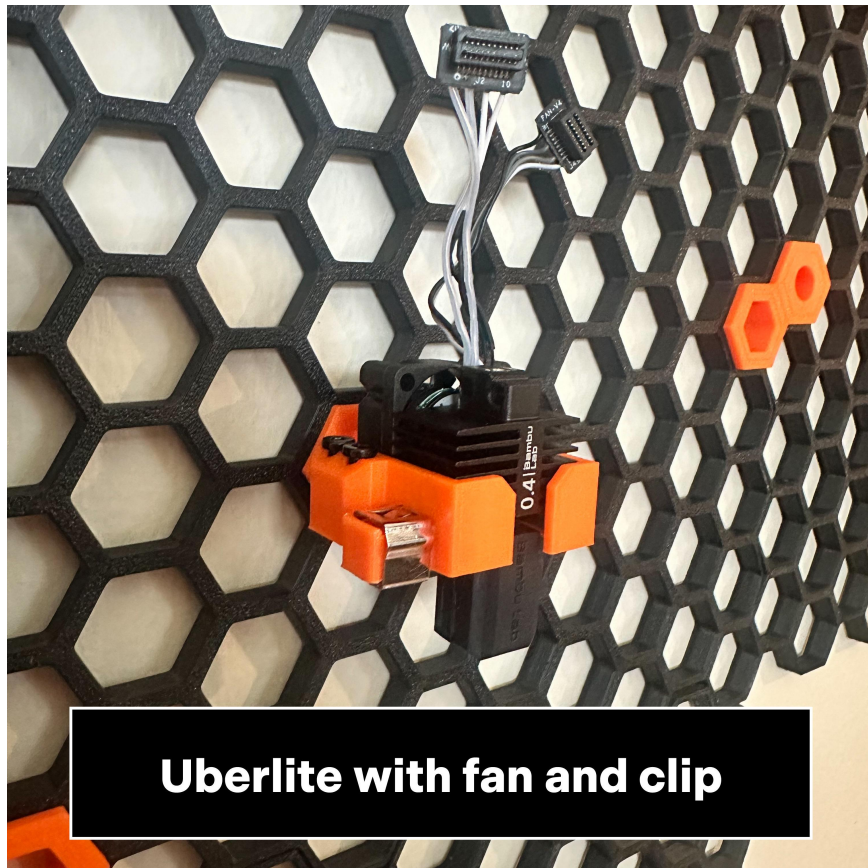

Each holder has slots for hotend retaining screws with a corner cutout for easy grabbing, and has enough room to drop hotends in with the rubber sock on.

## Variance

## Regular

- full, tall cover
- fan/no fan (no fan holder does not have a clip variant)
- with/without clip hanger
- small/regular insert type

## Uberlite

- less material, faster print
- fan/no fan (no fan holder does not have a clip variant)
- with/without clip hanger
- only small insert type

## This remix is based on
