Summary

I create a foot extension for the Ljungsbro tabel. This way my leg fit under this when i sit on the couch.

I buy a new couch and a coffee table from IKEA. This table, named Ljungsbro, has a moving platform that translate part of the table near you to eat or do things better when you sit on the couch.

Whit this particular combination (Couch-table), there is not enough room for the leg when you move up the platform.

So I created a foot extension, this way my leg fit under this when i sit on the couch.

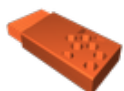

And now i can enjoy my cache while i watch TV.

If you want a different pattern, o no pattern, instead of the hexagon, or you want another high (the model is 100[mm] high), I am happy to make it for you.
