Summary

A storage case to store the drill and multiple bits

[vise](#) [visedrill](#)

I bought this Vise Drill from Aliexpress (no association) and just wanted a neater way to store it. Due to all the bits being loose. There are 48 bits, so I didn't want them on display.

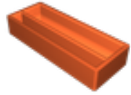

A container - contains lid and base

I printed in PETG with a 0.4 nozzle. You may notice that the edges of the top look a little dirty, as I forgot to purge orange filament from the nozzle.
