Tags: [lens](#) [cap](#) [fujifilm](#) [fuji](#) [x100](#) [x100s](#)

After misplacing my own lens cap I designed a snap-fit lens cap. I looked at various sites and there were caps with people's personal brands, caps with no logo, caps with the logo as text. I wanted the actual Fujifilm logo, so here we are.

The text can be hard to read depending on how fine tuned your machine is.

Printed on PLA, size up or down 1% if you're unhappy with the fit.

Printing face up or face down (no supports needed) seemed to make no difference.
