Summary

Phone Holder for RatRig V-Core 3.1

[3D Printers](#) > [Other Printer Parts & Upgrades](#)

Tags: [displaymount](#) [ratrig](#)

I made this holder for an old android phone that I use to run the [Mobileraker](#) app.

All models are optimised for printing and no support needed.

You need:

- 1 pc - M6 x 20 mm Screw
- 1 pc - M6 Nut

Attention! only for 300, 400 and 500 V-Core 3.1 ! The distance of the corner-brackets are different on the 200 V-Core 3.1 .

This remix is based on

Modular Mounting System
