Tags: [meshtastic](#) [rakwireless](#) [wisblock](#) [rak19007](#)

A minimalistic, zero protruding elements, pocketable, lightweight case for the Meshtastic RAK Wireless 19007.

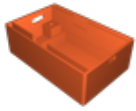

The objective for this case: it should be pocketable and not have any protruding antennas, second it should be compact and lightweight. The factory based PCB antennas of the 19007/4631 meshtastic board should be neatly tucked inside the case without impacting their performance.
