updated 6. 5. 2024 | published 6. 5. 2024

Summary

Use magnets to attach BentoBox to a magnetic surface

[3D Printers](#) > [Other Printer Parts & Upgrades](#)

Tags: bentobox

Use 2 6mm×3mm neodymium round magnets. Use superglue to secure the magnet in place if necessary (I found pressure fitting to be sufficient). Follow whatever is on the BentoBox manual for anything not specified here.

This remix is based on

BentoBox v2.0 Carbon filter for Bambu Lab X1C, enclosed P1P & Voron Trident & others?
