Headphones taking up too much desk space? This clamp puts 'em under the desk. Boom - Fixed.

What's that? You're messing around with a Raspberry Pi and you have heaps of micro SDs, SDs and USBs scattered around everywhere? Well today's your lucky day, let me fix this bad boy right up! Something something two birds with one stone!

Huh? You also play guitar and you're sick of having guitar picks all over your desk? Okay maybe take a step back, I feel like you're asking a bit much here (no jk come back I gotchu!)
