### Summary

A case to house a Roli Seaboard Block, a Lightpad block and a smaller block

Tags: [case](#) [lightpad](#) [seaboard](#) [roli](#)

This case perfectly fits a Roli Seaboard Block, a Lightpad block and a smaller block- perfect for keeping these little modular things together on your desk/during transport.

Too big to print on most printers, you might have to split it into parts to fit it on your bed (A prusa XL should be able to handle this size though)

I managed to annoy my university into letting me test PLA settings on their new AON3D industrial big boi.

Overkill? Yes. Took up hours and hours of my time that I'll never get back? Yes. Worth it? Absolutely Yes!
