[Hobby & Makers](#) > [Other Ideas](#)

I do not own 4 cylinders for Umarex CPSport (Walther P22 replica) so i wanted to design my own one cylinder speed loader instead of the square quad one.

Just put the cylinder into this loader, get there a few pellets or BB brocks (these work better and faster), close and shake. Then open the loader, push the pellets into the cylinder and pull it out.

Have a good fun with your airgun! :)
