updated 13. 5. 2024 | published 13. 5. 2024

Summary

Modified support of rogerquin so the bed cable curves upward, avoiding that it hits the back wall of my enclosure.

Tags: [sovolsv06](#) [sovolsv06upgrades](#)

The added curved part allows the cable to curve upward more and avoids that the cable hits the back wall of my enclosure.

Cable can be secured to the support using a small zip tie.
