updated 7. 5. 2024 | published 7. 5. 2024

### Summary

Add to the top of a bamboo stick and have up to 5 cords to help your beans climb.

[Household](#) > [Outdoor & Garden](#)

Tags: [plant](#) [support](#) [garden](#) [gardening](#) [bamboo](#) [climbing](#)

The top can fit any stick with a diameter between 20 and 5cm. Simply put the top on the stick and add up to 5 strings connected to the anker piece to help your plants grow and climb.

There are now two versions of the top.

- v1, a fast print, reminding very much on those warning cones used on roads, time will tell if it is sturdy enough...
- v2, for sure way stronger and longer to print. Reminds me more of a bullet and is inspired by the great idea of @sirmiss\_alot\_1253678 - thx man
