Summary

A fancy looking scope for your nerf blasters, mounts hardware free (its just a set of fancy looking irons)

[Sports & Outdoor](#) > [Outdoor Sports](#)

Tags: [nerf](#) [scope](#) [attachment](#) [dartblaster](#)

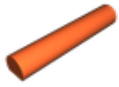

A """"scope"""" for your blasters, mainly cosmetic, but it can function as iron sights, the reticles inside the caps can be lined up for rough aiming and it has a set of actual iron sights on the top that look like a small red dot on top!

Print with standard settings, no support required, preoriented.

For nstrike just print the front, back and sightbodynstrike

For picatinny print Front, back SightBodyPicatinny and two PicatinnyPin
