## Summary

Charging stand for Garmin Vivoactive 5 or similar models.

[Gadgets](#) > [Other Gadgets](#)

Tags: [garmin](#) [chargingstand](#) [vivoactive5](#)

Based on my charging stand for Epix watches, I made this modification for Vivoactive 5 which fits the original charging cable (slightly pressed in) - please check attached model dimensions to verify you have the same plug on the end...

### Models included

- For original charging cable - depending on your printer, it press fits in or need to be secured by CA glue
- For non-original charging cable - it needs to be glued in

Both versions are in single and multicolor version

### Print instructions

- 0.6 Nozzle
- 0.2 Layer
- PLA

- Supports - yes (I used break away supports, therefore 0 top clearance).
