This insert is designed to fit Bears vs Babies in the photo caddy. Because of the size of the deck, the bottom layer is fairly thin and there is no extra room for the playmat that comes bundled with the furry box edition.

This design along with several others have OpenSCAD files available on my [GitHub](#)

Made specifically to fit Photo and Craft Keeper 4x6 inch storage bins (made by Simply Tidy and others), this collection of board game inserts allows you to ditch the boxes and consolidate your collection. For added convenience, each insert can work with Boardgame Barrio's printable box covers or covers you print yourself.
