Simple, but effective, camera mount for Raspberry Pi cameras such as [this one](#).

Designed to fit securely onto the Y axis extrusion with 4 x M4 x 12mm bolts and t-nuts.

The main camera housing bolts on to the top of the mount with a further M4 12mm nut and bolt.

I have also included a case that fits the standard RPi pinhole camera.

No support needed for any parts. Ensure that the main mount is printed lying on it's back.
