Summary

A basic print that lets you hold your headphones on your belt instead of leaving them around your neck or head.

Tags: [holder](#) [clip](#) [belt](#) [headphones](#)

A basic print that lets you hold your headphones on your belt instead of leaving them around your neck or head.

(Compatibility may vary between headphones/belts.)

I recommend printing with two perimeters in relatively flexible but still strong material. (Like enhanced PLA, I have not tested PETG)

The headphones in the photos are Bose QC45s.

(Found some proportions that worked and stuck with them. I could've spent forever testing different heights, widths, and thicknesses. Feedback is appreciated)

Check out the similar ear muff belt clip that I made:
