## Summary

I was browsing Amazon for Spatulas. Found this silicone part to hold spatulas and catch any drips. So I modeled it.

If you want to learn how to remix models you can find on [printables.com](https://www.printables.com) or how to prepare them for 3D printing with Autodesk Fusion, check out my book: "3D Printing with Fusion 360" on

- Amazon: <https://a.co/d/5ztftox>
- Packt website: <https://www.packtpub.com/product/3d-printing-with-fusion-360/9781803246642>

This is a parametric CAD file created with Autodesk Fusion

I was browsing Amazon for Spatulas and came across this silicone part that is meant to hold spatulas and catch any drips in a tray. So i decided to parametrically model it. Feel free to edit the 2 angles i set as favorite in Autodesk Fusion to modify the design to best fit your utensils.
