[bremsen](#)

AMG Brake Caliper for 360mm disc.

I Made it for old original brake disc as wall mounted decoration.

Scale 1:1 - the parts were cut so that they could be printed on a printer up to 20cm×20cm

Brake disc with a diameter of 36cm as a reference file.

If You also want to print the brake disc on a smaller scale because you don't have the original disc from the car and don't have big enough 3D printer, do not forget to reduce other parts by the same percentage.

It is enough to print all parts once if you want to mount the kit on the wall. I recommend mounting to the disc with a magnet embedded in the caliper. The brake pad locks itself in the caliper.

You need to print all files 1 time for a half a caliper. It is enough to print all parts once if you want to mount the kit on the wall.

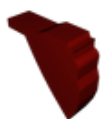

Print so many "Bolt" as You need to mount it easier together.

See my another projects for more AMG gadgets vehicle parts.
