Summary

Designed this to hold tidily my razor blades. Sliders help to adapt to how many blades you have left

[Household](#) > [Bathroom](#)

As you can see in the pictures I had troubles with detaching brim and I also printed this the wrong way up, as I thoughtfully designed to be printed on the "back".

I suggest that you print it on the back as it was supposed to, placing the material saving ovals on the print plate.

Trails' channels in the sliders shouldn't have any problem bridging without supports.
