Summary

A replacement cap for Brita's "Active" model water filter bottle.

Tags: [parametric](#) [fusion360](#) [brita](#)

The cap for our bottle cracked due to a drop, so I created this model to replace it.

Two models are available for download, one with a chamfer and one without. While the original cap does not have a chamfer, I recommend the chamfered model for a cleaner print (due to decreased overhang angle). Both models are designed for printing with a 0.4mm nozzle. The parametric source file (Autodesk Fusion format) is also available for download.
